

Technical features

Dimensions 482 x 380 x 95 mm

Weight 7 kg

Electrical supply not needed

Min. inlet pressure 2,5 bar

Max. inlet pressure 4 bar

Water production at 2,5 bar/25°C 60 lt/h

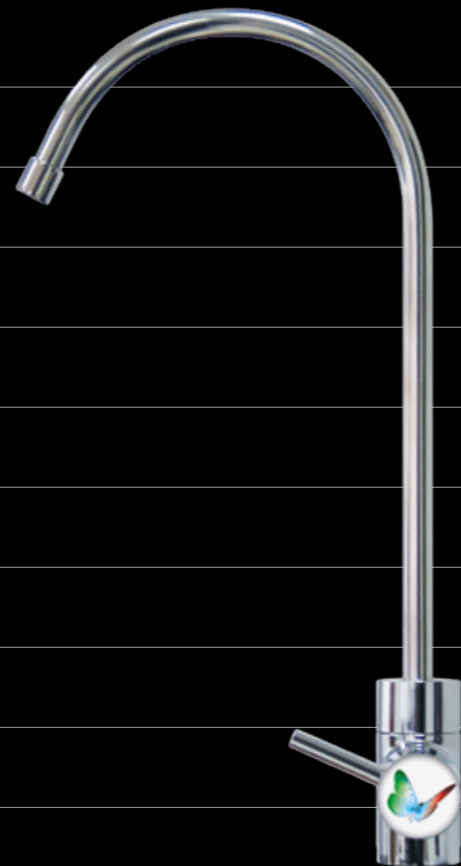

Water production at 3 bar/25°C 80 lt/h

Membranes 1000 GPD

Pre-filtration 1 active carbon filter

Water production continuous flow direct water production

Accessories tap

REVERSE OSMOSIS

Simplicity is the form of true greatness.
Here's how an idea is born.

Elegant

A simply perfect design.

Noiseless

WATER I works without the aid of a pump or motor, so it does not make any kind of noise while operating.

Thin and compact

Small and easy-fitting thanks to its dimensions, but great in its performance. Just using the simple pressure of the water supply network it is connected to, it is able to produce 60/70 litres of water an hour without the need of bulky accumulation tanks.

system placement

Saving

WATER I is small but also big at the same time because of the respect it gives to ecology. It does not need electricity to work, so it does not consume any energy.

Innovative SB4 technology

"Style wears technology". The revolutionary and innovative water filtration integrated system for domestic use which is unique in the world.

Reliability

Equipped with a bright LED as visual warning system to detect pre-filter exhaustion. The only system which comes with a 5-year warranty.
